ABOUT ME

Hello! I am , 3rd-year student in Computer Engineering at Karabük University, and I have been developing myself as a web application and web API developer. Specifically, I have been enhancing my skills in MSSQL, C#, and .NET technologies. Throughout my university education, I have made intensive efforts to blend theoretical knowledge with practical experience. Participating in various projects has enabled me to enhance my problem-solving skills and sharpen my coding abilities. Thanks to my eagerness to learn and improve, I continuously update and refine my skills in these technologies. I enjoy working in a team and exploring new technologies. Keeping up with evolving industry standards and staying current in this field is important to me. I am adaptable to teamwork, possess advanced analytical thinking skills, and excel in problem-solving. My openness to innovation and change constantly propels me forward towards better software development
